Dantrium Intravenous (Dantrolene Sodium for Injection) - Voluntary Type I Recall

October 2026

Knight Therapeutics Inc. is conducting a voluntary Type I recall of specific lots of Dantrium Intravenous (dantrolene sodium for injection), 20 mg/vial (DIN 01997572) in Canada. Health Canada was advised of this recall.

Affected Product

Product	DIN	Lot Number	Expiry Date
Dantrium Intravenous 20 mg/vial	01997572	80681	May 2027
Dantrium Intravenous 20 mg/vial	01997572	82413	August 2027
Dantrium Intravenous 20 mg/vial	01997572	91579	June 2028

Reason for Recall

This recall is being initiated because of presence of visible foreign particulate matter observed in vials from the affected Lots.

Actions for Healthcare Institutions and Healthcare Professionals

Healthcare institutions, wholesalers, pharmacies, and healthcare professionals should:

- Immediately stop use, distribution, and administration of affected lots.
- Identify and quarantine any remaining affected inventory.
- Follow instructions provided through recall communications and distribution channels for product return and reconciliation activities.

Knight Therapeutics Inc.'s Response

Knight Therapeutics Inc. has:

- Notified Health Canada of this recall.
- Stopped distribution of affected lots.
- Placed all remaining inventory under its control on hold.
- Initiated communications with wholesalers, hospitals, pharmacies, and other affected stakeholders.
- Commenced product reconciliation and effectiveness checks as part of the recall process.

Patient safety and product quality remain Knight Therapeutics Inc.'s highest priorities. Knight will continue to work closely with Health Canada and other stakeholders throughout the recall process.
