[1]Adjusted EBITDA is a non-IFRS measure, refer to section "Non-IFRS measures" for additional details

(In thousands of Canadian dollars, except for share and per share amounts)

Section 3 – GBT Integration Update

Prior to the acquisition of Knight, GBT was operating as four stand-alone companies: (i) Grupo Biotoscana, a regional specialty pharmaceutical focused on in-licensing headquartered in Colombia; (ii) United Medical, a Brazilian specialty pharmaceutical company focused on in-licensing; (iii) Laboratorio LKM, a regional specialty pharmaceutical company, based in Argentina focused on specialty branded generics; and (iv) Laboratorio DOSA, an Argentinian branded generic manufacturer focused on severe pulmonary pathologies ("GBT Companies"). The Company continues to focus on integrating Knight and the GBT Companies throughout 2021. The integration of GBT is complex due to its operations in ten different countries and has been further complicated due to COVID-19 restrictions.

During 2020, the Company made organizational and restructuring changes including at the level of GBT's management team. The total cost related to restructuring activities, including severance, was $3,871. Furthermore, the Company has also been implementing various processes and systems that would be essential in the integration process. During 2020 the Company initiated the implementation of a global ERP system with the intent to simplify and standardize the supply chain and finance functions. Knight's integration efforts during 2021 will include additional changes to the structure and teams as well as further global systems implementation. During 2021, Knight completed the implementation of a global customer relationship management system and initiated implementation of systems for human resources and training as well as pharmacovigilance. The Company expects that the integration of GBT will be substantially completed within the next 6 to 12 months.

FINANCIAL RESULTS

Section 4 – Results of Operations

Impact of Hyperinflation

The Company applies IAS 29, Financial Reporting in Hyperinflation Economies, as the Company's Argentine subsidiaries used the Argentine Peso as their functional currency. IAS 29 requires that the financial statements of an entity whose functional currency is the currency of a hyperinflationary economy be adjusted based on an appropriate general price index to express the effects of inflation. After applying for the effects of translation, the statement of income is converted using the closing foreign exchange rate of the month. The Company restated the revenues and operating expenses of each of the following months in the six months ended June 30 using the following general price indexes:

2021

January 2021	February 2021	March 2021	April 2021	May 2021	June 2021
1.20	1.16	1.11	1.07	1.03	1.00

2020

January 2020	February 2020	March 2020	April 2020	May 2020	June 2020
1.11	1.09	1.05	1.04	1.02	1.00

(In thousands of Canadian dollars, except for share and per share amounts)

If the Company did not apply IAS 29, the effect on the Company's operating income (loss) would be as follows:

Impact of LATAM Foreign Exchange volatility

The Company records its transactions and balances in the respective functional currencies of its subsidiaries. Generally, for the LATAM subsidiaries, the functional currency is the local currency in the country where the entity operates. In order to convert a foreign-denominated transaction to the functional currency, the exchange rate prevailing at the date of the transaction is used. Furthermore, upon consolidation, for all subsidiaries with a functional currency other than CAD, the respective statements of income are translated using the average exchange rates for the period. The table below summarizes the average foreign exchange rates used for the conversion of selected LATAM currencies:

(In thousands of Canadian dollars, except for share and per share amounts)

Rates	YTD-21	Q2-21	YTD-20	Q2-20
BRL	4.31	4.30	3.59	3.88
ARS	73.15	76.5	47.23	48.66
COP	2,912	3,012	2,705	2,778
CLP	578	583	597	594

The below table summarizes the variances for the three and six-month periods compared to prior year for selected LATAM currencies:

Variance (%)[1]	YTD-21 vs. YTD-20	Q2-21 vs. Q2-20
BRL	-20%	-11%
ARS	-55%	-57%
COP	-8%	-8%
CLP	3%	2%

[1]Negative percentage represents a depreciation of the currency while a positive variance represents an appreciation of the currency (versus the past quarter)

Impact

The depreciation of LATAM currencies during 2021 has negatively impacted the Company's results in two ways: (i) Transactional impact as certain product purchases and operating expenses are denominated in foreign currencies (mainly USD, EURO and CHF); and (ii) Translational impact: translation of local LATAM functional currency operating results to reporting currency in CAD.

Constant Currency

Financial results at constant currency[4] allow results to be viewed without the impact of fluctuations in foreign currency exchange rates thereby facilitating the comparison of results period over period. The presentation of results under constant currency is considered to be a non-GAPP measure and does not have any standardized meaning under GAAP. As a result, the information presented may not be comparable to similar measures presented by other companies.

Financial results at constant currency[1] are obtained by translating the prior period results from the functional currencies to CAD using the conversion rates in effect during the current period. Furthermore, with respect to Argentina, the Company excludes the impact of hyperinflation and translates the results at the average exchange rate in effect for each of the periods.

Revenues

Q2-21 vs Q2-20

For the quarter ended June 30, 2021 revenues increased by $12,546 or 24% versus the prior quarter. On a constant currency basis, revenues increased by $14,379 or 28%. The growth in revenues on a constant currency basis is explained as following:

- An estimated increase in revenues of approximately $5,500 to $7,000 driven by the increased demand of certain of our infectious diseases products to treat invasive fungal infections associated with COVID-19.
- An increase in revenues of $4,187 driven by the acquisition of Exelon®.
- An increase in revenues of $4,807 or 64% driven by the growth of our recently launched products, including Cresemba®, Lenvima®, Halaven®, Nerlynx®, Trelstar® and certain BGx products.

The Company generated net revenues as follows by therapeutic area:

	Q2-21 *Excluding impact of IAS 29*	Q2-20 *Excluding impact of IAS 29*	Q2-20 *Constant Currency*	Change	
Therapeutic Area	**$**	**$**	**$**	**$[1]**	**%[2]**

[1] *A positive variance represents a positive impact to net income due to the application of IAS 29 and a negative variance represents a negative impact to net income due to the application of IAS 29*

[2] *Percentage change is presented in absolute values*

The decrease in revenues in Oncology/Hematology is driven by the expiration of the distribution agreement for Abraxus® in Mexico partially offset by the growth of our recently launched products. The increase in revenues in the infectious disease therapeutic area is driven by the increased demand of certain of our infectious disease products to treat invasive fungal infections associated with COVID-19 and growth of our recent product launches. The increase in revenues in the Other Specialty therapeutic area is driven by the acquisition of Exelon®.

YTD-21 vs YTD-20

For the six-month period ended June 30, 2021 revenues increased by $12,776 or 13% compared to the same prior year period. On a constant currency basis, revenues increased by $18,502 or 20%. The growth in revenues on a constant currency basis is explained as following:

- An estimated increase in revenues of approximately $7,500 to $9,000 driven by the increased demand of certain of our infectious diseases products to treat invasive fungal infections associated with COVID-19.
- An increase in revenues of $4,187 driven by the acquisition of Exelon®
- An increase in revenues of $9,407 or 70% driven by the growth of our recently launched products, including, Cresemba®, Lenvima®, Halaven®, Nerlynx®, Trelstar® and certain BGx products.
- The increases are offset by the termination in 2020 of certain non-strategic license agreements and the commercial rights of Abraxane® in Mexico.

(In thousands of Canadian dollars, except for share and per share amounts)

The Company generated net revenues as follows by therapeutic area:

	YTD Jun-2021	YTD Jun-2020	YTD Jun-2020	Change	
	Excluding impact of IAS 29	*Excluding impact of IAS 29*	*Constant Currency*

[2] *Percentage change is presented in absolute values*

The decrease in revenues in Oncology/Hematology is driven by the expiration of the distribution agreement for Abraxus® in Mexico partially offset by the growth of our recently launched products. The increase in revenues in the infectious disease therapeutic area is driven by the increased demand of certain of our infectious disease products to treat invasive fungal infections associated with COVID-19 and growth of our recent product launches. The increase in revenues in the Other Specialty therapeutic area is driven by the acquisition of Exelon® offset by the termination in 2020 of certain non-strategic license agreements.

Gross margin

Q2-21 vs Q2-20

- For the quarter ended June 30, 2021 gross margin increased from 42% to 44% explained by a lower inventory provision recorded in Q2-21 compared to Q2-20 and a change in product mix partially offset by the re-negotiation of certain license agreements and the depreciation of the LATAM currencies.
- The gross margin would increase from 44% to 46% (Q2-20: 42% to 47%) excluding the impact of IAS 29 ("Adjusted Gross Margin"). Refer to "Impact of Hyperinflation" above for further details.

YTD-21 vs YTD-20

- For the six-month period ended June 30, 2021 gross margin increased from 42% to 44% explained by lower inventory provision recorded in YTD-21 compared to YTD-20 and a change in product mix partially offset by the re-negotiation of certain license agreements and the depreciation of the LATAM currencies.
- The gross margin would increase from 44% to 47% (YTD-20: 42% to 46%) excluding the impact of IAS 29 ("Adjusted Gross Margin"). Refer to "Impact of Hyperinflation" above for further details.

Selling and marketing

Q2-21 vs Q2-20

On a constant currency basis, S&M increased by $117 or 1% driven by increase in selling and marketing activities related to product launches and Exelon® offset by a net reduction of $1,719 in ECL expenses.

YTD-21 vs YTD-20

On a constant currency basis, S&M decreased by $1,519 or 8% driven by a reduction of $2,824 in ECL expenses offset by an increase in selling and marketing activities related to product launches and Exelon®.

(In thousands of Canadian dollars, except for share and per share amounts)

General and administrative	***Q2-21 vs Q2-20*** On a constant currency basis, G&A increased by $873 or 11% driven by an expense of $1,210 related to the extension of expiry date of certain stock options held by certain executive officers, directors and employees offset by a lower cost of restructuring activities during Q2-21 compared to the same prior year period. ***YTD-21 vs YTD-20*** On a constant currency basis, G&A increased by $202 or 1% driven by savings from restructuring activities and lower restructuring costs offset by an expense of $1,210 related to the extension of expiry date of certain stock options held by certain executive officers, directors and employees.
Research and development expenses	No significant variance.
Amortization of intangible assets	***Q2-21 vs Q2-20*** For the quarter ended June 30, 2021, amortization of intangible assets increased by $1,831, or 32%, mainly explained by the amortization of Exelon® acquired during Q2-21 partially offset by the depreciation of LATAM currencies. ***YTD-21 vs YTD-20*** For the for the period ended June 30, 2021, amortization of intangible assets increased by $1,094, or 9%, mainly explained by the amortization of Exelon® acquired during Q2-21 partially offset by the depreciation of LATAM currencies.
Interest income	***YTD-21 vs YTD-20 and Q2-21 vs Q2-20*** • Includes "Interest income on financial instruments measured at amortized cost" and "Other interest income". • Primarily from interest earned on loans, cash and cash equivalents, marketable securities and accretion on loans receivable. • Interest income for Q2-21 was $1,786 and YTD-21 $3,784, a decrease of 51% or $1,892 and 55% or $4,543 respectively, compared to the same period in prior year due to a decrease in interest rates, the average cash and marketable securities balances and a lower average loan balance.
Interest Expense	***YTD-21 vs YTD-20*** • Mainly relates to interest incurred on bank loans. • Interest expense for the six-month period ended June 30, 2021 decreased by $920 or by 41%, respectively, compared to the same period in prior year due to a decrease in the average loan balance outstanding. Refer to Section 7 for further information on the bank loans.
Net gain on financial assets measured at fair value through profit or loss	• As a result of the revaluation of financial assets measured at FVTPL. • Net gain mainly attributed to unrealized gains on revaluation of the strategic fund investments and realized gains recorded on distributions received. • Refer to Section 10 for further information.
Realized gain on sale of asset held for sale	• As a result of the disposal of the shares of Medison in Q1-20 the Company recorded a gain of $2,948, representing the difference between the book value and the selling price of $77,000.
Realized gain on automatic share purchase plan	• The gain in Q2-20 and YTD-20 relates to the gain on the ASPP liability as the Company completed its NCIB purchases while in a blackout period at a lower price than expected. • Refer to Section 14 for further details.
Foreign exchange loss	• The foreign exchange loss is mainly driven by the depreciation of the USD and EUR currencies throughout the period. • In addition to the foreign exchange loss recorded in the consolidated statement of income, the Company has recorded a gain of $4,745 for Q2-21 and a loss of $6,309 for YTD-21 in the statement of OCI related to the revaluation of the Company's entities from their respective functional currencies to the CAD.

(In thousands of Canadian dollars, except for share and per share amounts)

Gain on hyperinflation	• Relates to gain on net monetary position (monetary assets less monetary liabilities) under hyperinflation accounting. Refer to "Impact of Hyperinflation" below for further details. • Refer to note 2.3 in the Annual Financial Statements for further details on hyperinflation accounting.
Income tax expense	***Q2-21 vs Q2-20*** • The income tax recovery for Q2-21 is driven the reversal of certain tax provisions related to prior years as well as changes in the deferred tax expense due to timing differences and foreign exchange movements. • The income tax recovery for Q2-20 is driven by the reduction of deferred tax liability recorded on the definite-life intangible assets acquired as part of the acquisition of GBT offset by current income tax expense. ***YTD-21 vs YTD-20*** • The income tax recovery for Q2-21 YTD is driven the reversal of certain tax provisions related to prior years as well as changes in the deferred tax expense due to timing differences and foreign exchange movements. • The income tax recovery for Q2-20 YTD is driven by a deferred tax recovery with respect of an unrealized capital loss related to a foreign exchange contract entered into for the purpose of executing the Unified Tender Offer of GBT partially offset by the current income tax expense.

Non-IFRS measures

The Company discloses non-IFRS measures that do not have standardized meanings prescribed by IFRS. The Company believes that shareholders, investment analysts and other readers find such measures helpful in understanding the Company's financial performance and in interpreting the effect of the GBT Transaction on the Company. Non-IFRS financial measures do not have any standardized meaning prescribed by IFRS and may not have been calculated in the same way as similarly named financial measures presented by other companies.

The Company uses the following non-IFRS measures:

Financial results at constant currency: Financial results at constant currency are obtained by translating the prior period results from the functional currencies to CAD using the conversion rates in effect during the current period. Furthermore, with respect to Argentina, the Company excludes the impact of hyperinflation and translates the results at the average exchange rate in effect for each of the periods.

Financial results at constant currency allow results to be viewed without the impact of fluctuations in foreign currency exchange rates thereby facilitating the comparison of results period over period. The presentation of results under constant currency is considered to be a non-GAAP measure and does not have any standardized meaning under GAAP. As a result, the information presented may not be comparable to similar measures presented by other companies.

EBITDA: Operating loss adjusted to exclude amortization and impairment of intangible assets, depreciation, purchase price accounting adjustments, and the impact of IAS 29 (accounting under hyperinflation) but to include costs related to leases. In addition, EBITDA does not reflect the portion of GBT's results attributable to the non-controlling interests.

Adjusted EBITDA: EBITDA adjusted for acquisition costs and non-recurring expenses.

(In thousands of Canadian dollars, except for share and per share amounts)

Explanation of adjustments

Acquisition costs	Acquisition and transaction costs relate to costs incurred on legal, consulting and advisory fees for the acquisition of GBT and the acquisition of products. • During the three and six-month periods ended June 30, 2021 the Company incurred expenses of $82 and $432, respectively, related to acquisition of Exelon®. • During the three and six-month periods ended June 30, 2020 the Company incurred expenses of $104 and $320 on legal and consulting fees related to the acquisition of GBT.
Other non-recurring expenses	Other non-recurring expenses relate to expenses incurred by the Company that are not due to, and are not expected to occur in, the ordinary course of business. For the six-month period ended June 30, 2021, the Company incurred one-time costs of $112 related to restructuring activities including severance to certain employees as part of restructuring and integration of GBT. For the six-month period ended June 30, 2020, the Company incurred one-time costs of $2,068 and $304 for the three-month period ended June 30, 2020, explained as following: • $556 (Q2-20: $304) related to restructuring activities including severance to certain employees as part of restructuring and integration of GBT. • $874 (Q2-20: Nil) related to inventory destroyed due to a temperature excursion during transportation. The Company has initiated insurance claims for the loss and due to its contingent nature, the claim has not been recorded. • $638 (Q2-20: Nil) related to a bad debt against accounts receivable.

For the three-month and six-month periods ended June 30, 2021, the Company calculated EBITDA and adjusted EBITDA as follows:

Adjusted EBITDA Q2-21 vs Q2-20

For the quarter ended June 30, 2021 adjusted EBITDA increased by $1,743 or 23% and on a constant currency basis by $3,007 or 47%, compared to Q2-20. The growth in adjusted EBITDA is driven by an increase in gross of margin of $5,665 due to the increase in revenues offset by higher operating expenses of $1,304 due to the cost of the extension of the stock options and a reduction in the adjustments of reconciling items from operating income to adjusted EBITDA including acquisition, transaction costs, non-recurring expenses and purchase price accounting adjustments by $1,354.

Adjusted EBITDA YTD-21 vs YTD-20

For the six-month period ended June 30, 2021 adjusted EBITDA increased by $4,125 or 38% and on a constant currency basis by $6,191 or 70%, compared to the same prior year period. The growth in adjusted EBITDA is driven by an increase in gross of margin of $7,457 due

Section 5 – Consolidated Balance Sheets

Impact of LATAM Foreign Exchange volatility

The following table represents the quarter end closing rates used by Knight to convert the assets and liabilities on the balance sheet at the end of each reporting period. During 2021, the depreciation of the LATAM currencies led to a loss on translation of the Company's subsidiaries which is reflected in the statement of comprehensive income.

Rates	Q2-21	Q1-21	Q4-20
BRL	4.03	4.52	4.08
ARS	77.2	73.0	66.0
COP	3,040	2,950	2,710
CLP	589	576	561

The below table summarizes the variances quarter over quarter for selected LATAM currencies:

Variance (%)[1]	Q2-21	Q1-21
BRL	11%	-11%
ARS	-6%	-11%
COP	-3%	-9%
CLP	-2%	-3%

[1]*Negative percentage represents a depreciation of the currency while a positive variance represents an appreciation of the currency*

	06-30-21 vs 12-31-20
Cash and cash equivalents and marketable securities (current and long term)	• Refer to Section 7 – Liquidity and Capital Resources for further information.
Trade receivables	• Trade receivables increased by $7,006, or 11% mainly due to the growth in revenues offset by $2,708 depreciation of currencies in select LATAM countries.
Other receivables (current)	• Other receivables decreased by $5,715, or 46% mainly due a decrease in interest receivable as a result of lower cash, marketable securities and strategic loan balances. • Refer to note 6 in the Interim Financial Statements for further details.
Inventories	• No significant variance.
Other financial assets (current and long term)	Other financial assets increased by $23,409, or 12%, explained by the following: **Loans and other receivables:** decrease of $1,905 or 6% due to $2,494 loan repayments, refer to Section 9 for further information on Knight's strategic lending portfolio. **Equity investments and Derivatives:** decrease of $1,731 or 16% driven by the disposal of equity investments during the period, partially offset by the revaluation of equity investments and derivatives. Refer to note 9 in the Interim Financial Statements for further information. **Funds:** increase of $27,045 due to mark-to-market adjustments of $37,015, capital calls of $5,604, offset by distributions received and receivable of $11,370 and foreign exchange losses of $4,204. Refer to Section 10 for further information on Knight's strategic investments.
Income tax receivable	• Decrease relates to timing of income tax installments.
Intangible assets	• Increase mainly due to $217,331 related to the acquisition of Exelon® partially offset by the depreciation of the LATAM currencies during the period and amortization of intangible assets.
Goodwill	• Decrease due to the depreciation of the LATAM currencies during the period.
Accounts payable and accrued liabilities (current and long term)	• Increase in accounts payable and accrued liabilities balance by $21,589, or 48%, mainly driven by the following: o Increase of $17,140 relating to purchase of inventory driven by the growth in demand of certain products for treatment of COVID-19 related fungal infections. o $2,503 related to payables for shares purchased under the NCIB. o The remainder of the increase is related to the timing of accruals, payments and purchases.

(In thousands of Canadian dollars, except for share and per share amounts)

	06-30-21 vs 12-31-20
Bank loans (current and long term)	• Decrease of $16,621 or 32% mainly due to loan repayments of $14,911 and a decrease due to foreign exchange revaluation of $2,323 and partially offset by an overdraft increase of $613. • For further details on the bank loans held by GBT, refer to Section 7.
Income tax payable	• Decrease is mainly explained by reversal of certain tax provisions related to prior years and payment of fiscal year 2020 taxes in Q2-21.
Other balances payable (current and long term)	• No significant variance.
Deferred income tax liability	• No significant variance.
Share capital	• Decrease due to the purchase of Knight's common shares though the NCIB. • Refer to note 13 in the Interim Financial Statements for further information.
Contributed surplus	• Increase related to share-based compensation expense. • Refer to the statement of changes in equity and note 13 (ii) in the Interim Financial Statements for further information.
Accumulated other comprehensive loss	• Refer to the statement of changes in shareholders' equity in the Interim Financial Statements for further information.
Retained earnings	• Increase due to net income generated and common shares purchased through the NCIB. • Refer to the interim consolidated statement of changes in equity in the Interim Financial Statements for further information.

Section 6 – Notices of Reassessment

Knight received notices of reassessment from the CRA and the QRA in July 2018 and January 2019 respectively. The notices relate to the disposition in 2014 of a PRV held by Knight's wholly-owned subsidiary, Knight Therapeutics International S.A. A PRV is a transferrable asset that entitles the holder to a priority review for a drug of its choice.

The Company's PRV was granted on March 19, 2014 upon the FDA approval of Impavido® and was disposed of to a third party in November 2014 for gross proceeds of US$125,000. The notices of reassessment provide that Knight is liable to pay an aggregate of $23,340 and $18,242 to the CRA and QRA respectively in additional taxes and interest. Knight has made a deposit for the full amount to the CRA in July 2018 and to the QRA in February 2019.

Knight believes that the reassessments are unfounded and filed a notice of objection with CRA in September 2018 to start the appeals process. Based on the Company's view of the likely outcome of the appeals process, Knight expects to recover the total of $41,582 deposited and has not recorded any tax provision related to the disposal of the PRV in its financial statements. However, there can be no assurance regarding the outcome or when a resolution may be reached.

Although Knight believes its tax provisions are adequate, the final determination of tax audits and any related disputes could be materially different from historical income tax provisions and accruals.

Section 7 – Liquidity and Capital Resources

The Company's Investment Policy governs the investment activities relating to cash resources. An Investment Committee composed of representatives from management and the Board of Directors monitors compliance with said policy. The Company invests in strategic investments in the form of equity funds, debt funds, equity or liquid investment securities with varying terms to maturity, selected with regard to the expected timing of investments and expenditures for continuing operations and prevailing interest rates.

The Company believes that its existing cash, cash equivalents and marketable securities as well as cash generated from operations are sufficient to finance its current operations, working capital requirements and future product and corporate acquisitions. The table below sets forth a summary of cash flow activity and should be read in conjunction with our consolidated statements of cash flows.

PRODUCT ACQUISITION STRATEGY

Section 8 – Products

The Company's focus is to market and sell innovative products and engage in the development, manufacturing and marketing of specialty pharmaceutical branded generic products in Latin America and Canada, as well as select international markets.

Knight expects to expand its product portfolio within existing therapeutic fields in Canada and LATAM, and intends to leverage its expertise in specialty sales and marketing, branded generic development, product acquisition and in-licensing to gain a competitive advantage in delivering pharmaceutical products to the marketplace, thereby decreasing scientific risks, long development timelines and high development costs. In addition, Knight's wholly owned subsidiary, Knight Therapeutics International S.A., develops innovative pharmaceuticals including those used to treat neglected tropical diseases and rare pediatric diseases.

Following the completion of the GBT acquisition, the Company's priority is to leverage its existing infrastructure in LATAM and Canada by pursuing multiple avenues of growth that will further strengthen its platform and position Knight as a key player in the pan-American (ex-US) pharmaceutical market. The Company is pursuing a three-pronged strategy to build its product portfolio.

1. Acquisition of products, portfolios and companies

Knight is pursuing the acquisition of innovative products including portfolios that have been launched and marketed primarily by large pharmaceutical companies for a number of years. The acquisition of legacy products from global pharmaceutical is accretive to Knight's profitability and represents an opportunity to build a portfolio of owned assets with valuable and well-established brands. The acquisition of Exelon®, completed during the quarter, is an example of the execution of this strategy. The Company is also pursuing bolt-on corporate acquisitions in certain key markets that would further optimize its footprint, capabilities, and portfolio.

2. In-licensing of innovative products

The Company is pursuing the in-licensing of innovative late-stage products in its key therapeutic areas that include oncology/hematology, infectious diseases, immunology, gastrointestinal and central nervous system. In addition, the Company remains open to considering the in-licensing of products in other specialty areas where Company believes that there may be an attractive market opportunity. The in-licensing strategy represents future growth opportunities as the Company launches innovative and unique treatments across its markets.

3. Development of branded generic products

Through the GBT acquisition, the Company's development efforts have been concentrated on developing branded generics for Argentina and other LATAM markets. The Company is focusing its near-term efforts on expanding the geographic reach of currently developed branded generics. In addition, the Company is working on optimizing its development efforts and capabilities to allow it to access larger opportunities for LATAM.

Prescription Pharmaceutical Products

The Company has a pipeline of products in the process of being submitted for regulatory approval, in pre-commercialization and at its early stages of commercialization. Such activities require substantial financial investment therefore it is expected that the Company's selling and marketing, and research and development expenses will increase. The following summarizes certain products from Knight's product portfolio.

Section 9 – Strategic Lending

Knight finances other life sciences companies in all geographic markets with the goal of strengthening relationships in the life sciences industry and securing product distribution rights for Canada and select international markets. Typically, loans have low double-digit interest rates and may come with additional consideration to the Company. Loans often come with product rights or product options for Canada and select international markets. These loans strengthen Knight's ties within the life sciences industry and, in doing so, helped secure product rights for Knight either on a direct or indirect basis. As of the date hereof, Knight has four secured loans outstanding to life sciences companies as outlined in the table below. To date, the strategic lending portfolio has led to the acquisition of Neuragen and the in-licensing of several products from Antibe, 60P family, Profound and Triumvira.

Sectoral Asset Management

In October 2020 Atea Pharmaceutics Inc ("Atea"), an investment held within Sectoral Asset Management ("Sectoral"), announced the closing of its initial public offering at a public offering price of USD 24 per share. The shares held by Sectoral were subject to a 180-day lockup period which ended on April 27, 2021. Due to the volatility of the share price of Atea, the Company recorded an unrealized loss of $13,533 [USD 11,075] and $5,928 [USD 5,068] during the three-month and six-month periods ended June 30, 2021.To date, Knight has recorded a net gain of $8,881 in connection with Sectoral's investment in Atea.

Domain Associates LLC

On May 26, 2021 Singular Genomics Systems, Inc. ("SGS"), an investment held within Domain Associated LLC ("Domain"), announced the closing of its initial public offering at a public offering price of USD 22 per share. The shares held by Domain are subject to a 180-day lockup period. During the quarter ended June 30, 2021, the Company recorded an unrealized gain of $30,522 [USD 24,626]. As at August 11, 2021, SGS's share price closed at USD 15.23. Should the share price of SGS remain at this level, the Company would record an unrealized loss of approximately $14,030 [USD 11,320].

Other investments

Medexus

During the three-month period ended March31, 2021, Knight sold 315,600 common shares of Medexus for total proceeds of $2,624 realizing a gain of $1,639. The common shares were acquired by Knight at an average cost of $3.12 per share.

For additional details regarding the movement in equities or derivatives held by Knight throughout the quarter, refer to note 8 "Other Financial Assets" of the Interim Financial Statements.

Section 11 – Rest of World Strategy

Knight's international strategy is focused on identifying potential products and companies that fit within its existing business model, but that are located in select areas such as Latin America, Middle East, Israel, Australia, Romania, Russia, Sub-Saharan Africa, and other countries excluding the U.S., Western Europe, Japan and China. Knight believes Latin America and the other countries where it wants to grow internationally provide potentially significant growth and value opportunities.

RISK MANAGEMENT

Section 12

12.1 Currency Risk

GBT Transaction

Effective November 29, 2019, upon close of the GBT Transaction, the Company has significant exposure to foreign currencies of emerging markets in Latin America. GBT generates a significant portion of its revenues in BRL, ARS and COP as well as a basket of other Latin American currencies (BOB, MXN, PEN, PYG, UYU and CLP). Such currencies have been historically volatile and could create significant fluctuations on the Company's result when translated to CAD. Furthermore, GBT is exposed to a currency mismatch due to certain pharmaceutical products, active pharmaceutical ingredient and operating costs denominated in currencies of developed markets (CHF, USD, EUR). The currency mismatch exposes GBT to foreign exchange risks which could result in significant fluctuations of the Company's gross margin or net income.

(In thousands of Canadian dollars, except for share and per share amounts)

Currency risks in net financial assets

Knight holds a significant portion of its net financial assets in USD, EUR, BRL, CLP and ARS which results in financial risk due to fluctuations in the value of the currencies relative to the Canadian dollar.

The Company has subsidiaries throughout LATAM whose functional currencies differ from the CAD. Knight does not believe that the foreign exchange impact in the consolidated statement of income represents its full currency exposure. The below analysis excludes intercompany balances but includes balances that get revaluated to CAD through other comprehensive income. Assuming all other variables remain constant, a 5% change, would result in a change in the consolidated statement of income or statement of other comprehensive income as follows:

	$
Foreign Exchange Risk (5% change)	
USD	**5,527**
EUR	**2,043**
BRL	**875**
CLP	**201**
ARS	**107**

12.2 Equity Price Risk

Equity price risk arises from changes in market prices of the equity and fund investments and derivatives. The carrying values of investments subject to equity price risk are $186,611 as at June 30, 2021 (December 31, 2020: $160,847). The Company monitors its equity investments for impairment on a periodic basis and at least every reporting period. Market prices are subject to fluctuation and, consequently, the amount realized in the subsequent sale of an investment may significantly differ from the reported market value. Fluctuation in the market price of a security may result from perceived changes in the underlying economic characteristics of the investee, the relative price of alternative investments and general market conditions. For example, during 2020 and Q1-2021, Knight recorded a gain of $22,418 related to Sectoral's investment in Atea. However, due to market declines in Atea's stock price, Knight recorded a loss of $13,533 [USD 11,075] during Q2-2021. Further, through its strategic fund investment, Knight has recorded gains on investment in SGS based on the closing share price as at June 30, 2021, refer to Section 10 for further information. However, as at August 11, 2021, SGS's share price closed at USD 15.23. Should the share price of SGS remain at this level the Company would record a loss of approximately $14,030. Furthermore, amounts realized in the sale of a particular security may be affected by the relative quantity of the security being sold. The Company's Board of Directors regularly reviews and approves equity investment decisions.

12.3 Interest Rate Risk

The Company is subject to interest rate risk on the interest income generated on its cash, cash equivalents and marketable securities. Details regarding maturity dates and effective interest rates are described in note 4 of the Interim Financial Statement. Assuming that all other variables remain constant, a 1% decline on the interest rate generated on cash, cash equivalents and marketable securities would have resulted in a reduction of interest income of $1,661 over a one-year period.

In connection with debt held in GBT, the Company is exposed to interest rate risks arising from its loans with Itaú Brazil, Santander Brazil and Bancolombia. Details regarding maturity dates and effective interest rates are described in Section 7. The loans have a variable interest rate that fluctuates with the CDI rates. The applicable CDI is the average of the CDI rates applicable during each interest period and therefore the accrued interest at year end with the loans are not exposed to any changes related to variation of the respective floating rates. In the case of the IBR, the applicable rate is the one at the beginning of the interest period, so the accrued interest at year end is not exposed to any changes related to variation of the respective floating rates. Assuming that all other variables remain constant, a 1% increase on the interest rate would have resulted in an increase of interest expense of $351 over a one-year period.

During the six months of 2021, the CDI rate in Brazil increased multiple times from 1.90% to 4.15% in June. As a result, the effective annual interest rate on the Itaú Unibanco and Banco Santander loans are expected to be higher during Q3-21.

12.4 Liquidity Risk

The Company generates sufficient cash from operating activities to fulfill its obligations as they become due. The Company has sufficient funds available through its cash, cash equivalents and marketable securities should its cash requirements exceed cash generated from operations to cover all financial liability obligations. Periodically, the Company forecasts their projected cash flows both at the subsidiary and consolidated level. If any issues are identified, the corporate teams work with the local teams to provide liquidity support. The Company negotiates lines of credit with global and regional banks to diversify its options and ensure competitive financing rates.

As at June 30, 2021, there were no restrictions on the flow of these funds nor have any of these funds been committed in any way, except as set out in note 20 of the Interim Financial Statements.

12.5 Credit Risk

The Company considers its maximum credit risk to be $281,977 (December 31, 2020: $254,324) which is the total of the following assets: trade and accounts receivable, other receivable, interest receivable, loans receivable and investment in funds.

The marketable securities and cash equivalent balances are subject to minimal risk of changes in value and are invested in institutions with a S&P or DBRS credit rating of A or R1(low) or better which are invested in the following:

- two Canadian financial institutions
- three Canadian credit unions

The Company is exposed to credit risk from its customers and continually monitors its customers' credit. Individual credit limits are established after an analysis of the client's credit history, credit ratings, and forward-looking information provided by internal and external sources. There is a credit policy in place to ensure that these limits are periodically reviewed and immediately adjusted if needed. Furthermore, the Company establishes the ECL based upon days past due and the likelihood of collection for each customer.

The credit risk on loans and interest receivable is due to the risk of insolvency or operational failure of the partners in the strategic lending transaction. The Company has assessed that loans measured at FVTPL have S&P credit ratings between CCC+ and CC. The Company also has a credit risk on its investment in funds and derivatives which are held through venture funds or issued by a counterparty.

12.6 COVID-19 Risk

The COVID-19 pandemic continues to present a substantial global public health and economic challenge. A public health pandemic, including COVID-19, poses the risk that the Company and its employees, contractors, suppliers, and other partners may be prevented from conducting business activities for an indefinite period of time, including due to reoccurring shutdowns that may be requested or mandated by governmental authorities. Certain countries where the Company has significant operations, continue to require entities to limit or suspend business operations and have implemented travel restrictions and quarantine measures.

As with much of the pharmaceutical industry, the Company's revenues from launch products and resulting prescription growth has been adversely affected by COVID-19. Knight suspended in-person promotional and medical activities in all countries since March 2020. The Knight field team continues to use digital means to interact with healthcare providers. These interactions tend to be less frequent and in the case of complex infectious disease and oncology product launches, potentially less impactful. While it is not possible at this time to estimate the impact that COVID-19 could have on the Company, the continued spread of COVID-19 and the measures taken by the governments of countries affected could disrupt

the supply chain and the manufacture or shipment of product inventories and adversely impact the Company's business, financial condition or results of operations.

In 2021, the global economy has, with certain setbacks, begun reopening, and wider distribution of vaccines will likely encourage greater economic activity. However, COVID-19 cases continue to rise in many locations around the world where vaccination rates remain low and new, more contagious variant strains of COVID-19 have emerged, resulting in continued restrictions. In particular, certain countries within Latin America are continuing to be significantly impacted. We are unable to predict how widely utilized the vaccines will be, whether they will be effective in preventing the spread of COVID-19 (including its variant strains), and when or if normal economic activity and business operations will fully resume. We are closely monitoring the impact of the COVID-19 pandemic, including the emergence of variant strains of the virus, on our business, however, it is difficult to predict the future impact COVID-19 may have on our business, results of operations, financial position and cash flows. It is possible that the estimates used in the preparation of the Interim Financial Statements can change in the near term and may have a material impact. Potential impacts may include, but are not limited to, impairment of intangible assets, goodwill, property plant and equipment, and financial assets, write-downs on inventory and a change in the expected credit loss on accounts receivable. The Company has sufficient liquidity to meet all operating requirements for the foreseeable future.

During the first six months of 2021, there was an increase in demand for certain of our infectious disease products used to treat invasive fungal infections associated with COVID-19 (refer to Section 4 discussion on revenues for additional details). The related demand may be volatile in the future depending on vaccination and infection rates in the countries where Knight operates.

While the majority of the Company's employees continue to work remotely, including with the use of digital sales channels, certain territories have begun to hold limited in person meetings with protective safety measures. The Company is developing return to field or office protocols on a country-by-country basis to ensure compliance with local regulations, ensuring safety of employees, patients and healthcare professionals.

12.7 Emerging Market Risk

The Company is exposed to additional risks related to investing and operating in international locations including emerging markets. Operating in such markets carries substantial inherent financial, legal and political risks. If Knight cannot integrate its acquisition successfully, these changes could have a material adverse effect on the business, financial condition, results of operations and cash flows. In addition, operating in international jurisdictions are subject to risks inherent in conducting business abroad, including possible nationalization or expropriation, price and currency exchange controls, fluctuations in the relative values of currencies, political instability and restrictive governmental actions.

12.8 Risk Factors

For a detailed discussion of additional risk factors, please refer to the Company's latest Annual Information Form on SEDAR at www.sedar.com.

[2] Excludes 590,035 shares purchased under NCIB but not yet canceled as of August 11, 2021

On July 10, 2020, the Company announced that the Toronto Stock Exchange approved its notice of intention to launch for a NCIB ("2020 NCIB"). Under the terms of the 2020 NCIB, Knight may purchase for cancellation up to 10,856,710 common shares of the Company which represented 10% of its public float as at July 6, 2020. The 2020 NCIB commenced on July 14, 2020 and ended on July 13, 2021.

On July 12, 2021, the Company announced that the Toronto Stock Exchange approved its notice of intention to launch a NCIB ("2021 NCIB"). Under the terms of the 2021 NCIB, Knight may purchase for cancellation up to 10,267,956 common shares of the Company which represented 10% of its public float as at June 30, 2021. The 2021 NCIB commenced on July 14, 2021 and will end on the earlier of July 13, 2022 or when the Company completes its maximum purchases under the NCIB. Furthermore, Knight entered into an agreement with a broker to facilitate purchases of its common shares under the NCIB. Under Knight's automatic share purchase plan, the broker may purchase common shares which would ordinarily not be permitted due to regulatory restrictions or self-imposed blackout periods.

A copy of the notice to commence the NCIB is available without charge by contacting the Company by email at info@gudknight.com or by phone at 514-484-4483.

During the three and six-month periods ended June 30, 2021, the Company purchased 1,324,076 and 4,881,416 common shares for an aggregate cash consideration of $6,954 and $25,546, of which $2,503 remains to be settled as at June 30, 2021. Subsequent to quarter-end, the Company purchased an additional 2,675,917 common shares, for an aggregate cash consideration of $13,865.

Section 15 – Use of Proceeds from Financing

To date, Knight has raised net proceeds of approximately $685,000 from five public offerings. In our short form prospectuses related to the offerings, Knight disclosed that its intent was to use a substantial portion of the net proceeds (i) for potential acquisitions of (a) in-licensing of over-the-counter and prescription pharmaceutical products and targeted promotion of these products, and (b) specialty pharmaceutical businesses in select international markets, (ii) for financing of other life sciences companies in Canada and internationally as well as for investments in funds focused in the life sciences sector, and (iii) the remainder for general corporate purposes.

On December 23, 2020, the Company announced that it filed a short form base shelf prospectus which enables Knight to offer for sale and issue up to $360,000 in common shares, subscription receipts and debt securities from time to time during the 25-month period during which the shelf prospectus remains valid. Following the GBT Transaction, Knight has access to more growth opportunities, including acquisitions of products as well as bolt on acquisitions of specialty pharmaceutical companies for its pan-American (ex US) footprint. The shelf prospectus provides Knight the financing flexibility without any incumbent obligation to use the instrument as it pursues larger opportunities.

As at June 30, 2021, Knight had deployed and invested or committed to deploy and invest over $700,000 for the purposes disclosed in the prospectuses, as described above. Knight anticipates that it has sufficient funds available to achieve its business objectives and milestones as listed in the prospectuses.

Section 16 – Payment of Dividends

The Company has not paid dividends on its common shares since inception and does not anticipate declaring dividends in the foreseeable future. Knight's current policy is to retain earnings to finance the acquisition and development of new products and to reinvest in the growth of the Company. Any future determination to pay dividends is at the discretion of the Company's Board of Directors and will depend on the Company's financial condition, results of operations, capital requirements and other such factors as the Board of Directors of the Company deems relevant.

Section 17 – Product Pricing Regulation on Certain Drug Products

Canada

All patented drug products sold in Canada that form part of Knight's portfolio of products are subject to pricing regulation by the PMPRB, a federal agency tasked with ensuring that prices of patented medicines are not excessive. For new patented products, the maximum non-excessive list price ("MLP") in Canada will be set by the lower of the list price and the median international price ("MIP") for the same drug sold in a specified set of developed comparator countries. Otherwise, the MLP will be set by the lower of the list price and the top of the domestic prices of existing comparable drugs sold in Canada. For existing patented products, prices cannot be increased annually by more than a factor based on Statistics Canada's Consumer Price Index. The PMPRB monitors compliance through a review of the average transaction price of each patented drug product as reported by pharmaceutical companies like Knight on a semi-annual basis. The PMPRB may from time to time deem certain of Knight's existing or future patented products to be excessively priced based on the application of its empowering legislation and regulations, including those related to price increases, the comparative assessment of new

products and reductions in the highest price in international reference countries. Such determinations by the PMPRB may have a material adverse effect on Knight's financial condition and results of operations or cash flows.

The Canadian federal government has made a commitment to reduce the cost of prescription drug pending in Canada. On December 2, 2017, Health Canada published the following proposed key changes:

- changes in the comparator countries used to determine price ceilings. The changes include removal of the US (which generally has the highest international drug prices) and Switzerland and addition of seven new countries judged to have similar consumer protection-oriented mandates and relative wealth as Canada;
- new, economics-based price regulatory factors to allow the PMPRB to regulate based on the value of a medicine and its impact on the health care system; and,
- changes to certain reporting requirements, including reporting all discounts and rebates provided to third-party payers, such as provincial drug plans.

On August 21, 2019, the federal government published the final regulations governing the PMPRB. The new regulations include eleven countries as comparators and was expected to come into force on July 1, 2020. On November 21, 2019, the PMPRB published a draft set of new guidelines for the implementation of the final regulations. The PMPRB began seeking views of stakeholders and interested members of the public and extended their consultation period in connection with the guidelines through February 14, 2020. The PMPRB published final Guidelines on October 23, 2020. The implementation of the amended PMPRB regulations was delayed due to COVID-19 and are now expected to come into force on January 1, 2022.

The regulatory changes to the PMPRB may have a significant adverse effect on the price of patented drugs sold by the Company in Canada and may limit the Company's ability to in-license and launch products in Canada due to more restrictive pricing regulations.

LATAM

In certain countries in LATAM, the price of pharmaceuticals is subject to extensive government regulations, which may include the imposition of price controls, reference pricing and maximum price caps, mandated price reductions to battle hyper-inflation and limitations on price increases. Price negotiations with government agencies, HMOs and other buyers may take considerable time after the Company has received its marketing authorization for a product. In certain countries where our products are not reimbursed by HMOs, patients may seek access to such medicines through a judicial action. Delays in pricing and reimbursement approvals may have a negative impact on the Company's cash flows and profitability. In addition, in certain countries Knight may be forced to reduce its pricing, offer discounts, forgive certain balances outstanding in order to comply with cost-containment measures. As pricing regulations evolve throughout the various countries, Knight may have a material adverse impact on its cash flows and profitability.

Section 18 – Financial Instruments

The Company's investment policy regulates the investment activities relating to cash resources. The Company invests in strategic investments in the form of equity funds, debt funds, equity or liquid investment securities with varying terms to maturity, selected with regard to the expected timing of investments and expenditures for continuing operations, and prevailing interest rates.

Section 19 – Off-balance Sheet Arrangements

The Company's off-balance sheet arrangements consist of contractual obligations and agreements for development, sales, marketing and distribution rights to innovative drug products. The effect of terminating these arrangements under normal operating circumstances consists of an effective transition of the remaining responsibilities and obligations to the licensor under agreed upon time frames and conditions. Please refer to note 19 of the Interim Financial Statements for the period

(In thousands of Canadian dollars, except for share and per share amounts)

ended June 30, 2021 for additional information. Other than these contractual obligations and commitments, the Company does not have any off-balance sheet arrangements that have, or are reasonably likely to have, a current or future effect on the Company's financial condition, changes in revenues or expenses, results of operations, liquidity, capital expenditures, or capital resources that are material to investors.

Section 20 – Commitments

In the normal course of business, the Company secures development, sales, marketing and distribution rights to innovative drug products requiring royalties or product payments considered normal operating commitments and as such not included herein. The Company has entered into various agreements which include contractual commitments extending beyond the current year. These commitments are classified into three major categories: Fund commitments, milestones and purchase commitments, and loan commitments. The commitments of the Company as at June 30, 2021 are as follows:

[i] Fund commitments

As at June 30, 2021, under the terms of Company's agreements with life sciences venture capital funds, $27,506 (December 31, 2020: $31,500), including $4,396 [US$3,547] and $6,688 [EUR 4,550] (December 31, 2020: $5,952 [US$4,675] and $7,102 [EUR 4,550]), may be called over the life of the funds (based on the closing foreign exchange rates).

[ii] Milestones and purchase commitments

Under certain agreements, Knight may have to pay additional consideration should the Company achieve certain sales volumes or if certain milestones are met, such as regulatory approval in Canada or LATAM. The Company may have to pay up to $303,274 including $42,332 [US$34,155], $132,372 [CHF 98,800] and $566 [EUR 385] upon achieving certain sales volumes, regulatory or other milestones related to specific products.

In addition, Knight has a commitment to purchase up to $1,084 [EUR 738], of inventory for pharmaceutical products during the five-year period after their respective commercial launch. For products that are currently launched, the Company has committed to inventory purchases of $274,630 [BRL 693,749, USD 62,395 and CHF 18,793], which will be purchased over the next 8 years.

2026 and beyond	30,375
Total	**274,630**

Furthermore, Knight has committed to certain sales force and marketing spend obligations during the five-year period after the commercial launch of one of its products.

[iii] Loan commitments

Subject to the Moksha8 Financing Agreement, Knight has committed to loan up to an additional $10,535 [US$8,500] should the borrower meet certain pre-defined profitability targets over its 2020 to 2021 financial years.

(In thousands of Canadian dollars, except for share and per share amounts)

Section 21 – Related Party Transaction

Pharmascience Inc., a company related to the Company's CEO, provided administrative services of approximately $41 and $45 (2020: $4 and $8) to the Company for the three and six-month periods ended June 30, 2021.

Section 22 – Segment Reporting

Upon the acquisition of an additional 48.74% of GBT (resulting in 99.9% ownership of GBT), the Company had one reportable segment, namely the development, acquisition, in-licensing, out-licensing, marketing and distribution of innovative pharmaceutical products, consumer health products and medical devices in Canada and select international markets. This reflects the revised management structure and the way that the chief operating decision-maker evaluates the business. As a result of the change in ownership effective in August 2020, the Company retrospectively revised the segmented information for the comparative period to conform to the new segmented structure.

Section 23 – Significant Accounting Estimates and Assumptions

The preparation of the Company's consolidated financial statements requires management to make judgments and estimates that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts or revenues and expenses during the reporting period. Reported amounts and note disclosures reflect the overall economic conditions that are most likely to occur and anticipated measures management intends to take. Actual results could differ materially from those estimates. Our significant accounting estimates and assumptions are reported in note 3 of our 2020 Annual Financial Statements.

Section 24 – Recent Accounting Pronouncements

Various pronouncements have been issued by the International Accounting Standards Board or IFRS interpretations committee that will be effective for future accounting periods. The Company closely monitors new accounting standards as well as amendments to existing standards and assesses what impact, if any, they will have on the consolidated financial statements. None of the standards issued to date are expected to have a material effect on the Interim Financial Statements.

Section 25 – Disclosure Controls and Procedures

The Company is committed to providing timely, accurate and balanced disclosure of all material information about the Company and to providing fair and equal access to such information. Management is responsible for establishing and maintaining its DC&P to ensure that information used internally and disclosed externally is complete and reliable. Due to the inherent limitations in all control systems, an evaluation of controls can provide only reasonable, not absolute assurance, that all control issues and instances of fraud or error, if any, within the Company have been detected. Management continues to evolve and enhance its system of controls and procedures.

Section 26 – Internal Control Over Financial Reporting

The Company's management is responsible for establishing and maintaining adequate ICFR. The Company has designed ICFR to provide reasonable assurance regarding the reliability of financial reporting and the preparation of consolidated financial statements in accordance with IFRS.

All control systems, no matter how well designed, have inherent limitations, including the possibility of human error and the circumvention or overriding of the controls or procedures. As a result, there is no certainty that our DC&P or ICFR will prevent all errors or all fraud.

During the quarter ended June 30, 2021, there was no significant changes in our internal control over financial reporting that materially affected or is reasonably likely to materially affect the Company's internal controls over financial reporting.

1. NATURE OF OPERATIONS

Description of business

Knight was incorporated on November 1, 2013 under the Canada Business Corporations Act. The Company is a specialty pharmaceutical company, and its principal business activity is acquiring, in-licensing, out-licensing, developing, manufacturing, marketing and distributing pharmaceutical products in Canada, Latin America and select international markets. The Company's corporate headquarters are located at 3400 de Maisonneuve Boulevard West, Suite 1055, Montreal, Quebec, H3Z 3B8. Knight is listed on Toronto Stock Exchange under the ticker symbol "GUD".

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

2.1 Basis of presentation

These interim condensed consolidated financial statements have been prepared in accordance with International Accounting Standard 34 "Interim Financial Reporting". Accordingly, certain information and footnote disclosure normally included in annual financial statements prepared in accordance with International Financial Reporting Standards ("IFRS") have been omitted or condensed.

These interim condensed consolidated financial statements should be read in conjunction with the consolidated financial statements for the year ended December 31, 2020.

The Company's interim condensed consolidated financial statements as at and for the three and six-month periods ended June 30, 2021 and 2020 were authorized for issue by the Board of Directors on August 12, 2021.

Impact of the COVID-19 Pandemic

There is significant uncertainty regarding the potential impact that the ongoing pandemic may have on the Company's operations. The extent to which the impacts of COVID-19 affect the judgments and estimates described in note 3 of the consolidated financial statements for the year ended December 31, 2020 depends on future developments, which are highly uncertain and cannot be predicted.

In 2021, the global economy has, with certain setbacks, begun reopening, and wider distribution of vaccines will likely encourage greater economic activity. However, COVID-19 cases continue to rise in many locations around the world where vaccination rates remain low and new, more contagious variant strains of COVID-19 have emerged, resulting in continued restrictions. Uncertainties related to the continued magnitude and duration of the COVID-19 pandemic, the extent to which it will impact our estimated future financial results, worldwide macroeconomic conditions including interest rates, employment rates, consumer spending, health insurance coverage, how widely utilized the vaccines will be, whether they will be effective in preventing the spread of COVID-19 (including its variant strains), the speed of the reopening and anticipated recovery and governmental and business reactions to the pandemic, including any possible re-initiation of shutdowns or renewed restrictions, have increased the complexity of developing these estimates, including the allowance for inventory obsolescence, expected credit losses and the carrying values of financial assets, property plant and equipment, goodwill, other intangible assets and deferred tax assets. Actual results may differ significantly from our estimates as a result of COVID-19. Management is not able to predict the impact that the COVID-19 pandemic will have in the future due to numerous uncertainties, including the severity of the disease and its variants, the duration of the pandemic, actions that may be taken by governmental authorities, the impact to the commercial operations and supply chain. Management will continue to monitor and assess the impact of the pandemic on its judgments, estimates, accounting policies and amounts recognized in these unaudited interim consolidated financial statements.

2.2 Summary of significant accounting policies

The accounting policies adopted in the preparation of the interim condensed consolidated financial statements are consistent with those set out in note 2 "Summary of significant accounting policies" of the Company's annual consolidated financial statements for the year ended December 31, 2020, except for restricted share units ("RSUs"),

performance share units ("PSUs") and deferred share units ("DSUs") awarded under Omnibus Equity Incentive Plan (the "Omnibus Plan") which was approved by shareholder of the Company on May 13, 2021. The related accounting policies are as follows:

Restricted share units
RSUs are expected to be settled by the issuance of the Company's shares, although they can be settled in cash at the Company's option. RSUs vest at the end of the three-year period from the date of the grant. The fair value of each grant of RSUs is the fair value of the Company's share price on the date of the grant. The number of RSUs expected to vest are estimated on the grant date and subsequently revised on each reporting date. The resulting compensation expense, adjusted for forfeitures, is charged to income over the period the participants unconditionally become entitled to the award, with a corresponding increase to contributed surplus, on a straight-line basis.

Performance share units
PSUs are expected to be settled by the issuance of the Company's shares, although they can be settled in cash at the Company's option. PSUs vest at the end of the three-year period from the date of the grant upon the achievement of certain non-market vesting conditions. The fair value of each grant of PSUs is the fair value of the Company's share price on the date of the grant. The number of PSUs expected to vest are estimated on the grant date and subsequently revised on each reporting date. The resulting compensation expense, adjusted for expectations related to non-market performance conditions and forfeitures, is charged to income over the period the participants unconditionally become entitled to the award, with a corresponding increase in contributed surplus, on a straight-line basis.

Deferred share units
DSUs are awarded to Directors of the Company and vest when they cease to be a member of the Board of Directors. DSUs are expected to be settled by the issuance of the Company's shares and are recognized as general and administrative expenses on the date of grant using the Company's share price as the fair value.

10. MEASUREMENT OF FINANCIAL ASSETS

The Company uses the following hierarchy for determining and disclosing the fair value of financial instruments by valuation technique:

Levels	Description	Type of financial instruments normally classified as such
Level 1	Quoted (unadjusted) prices in active markets for identical assets or liabilities.	• Investments in equities[1]
Level 2	Other valuation techniques for which all inputs which have a significant effect on the recorded fair value are observable, either directly or indirectly.	• Investments in equities[2]
Level 3	Techniques which use inputs which have a significant effect on the recorded fair value that are not based on observable market data.	• Investments in equities[3] • Investments in funds • Loans and receivables measured at FVTPL • Loans and receivables measured at Amortized Cost • Derivatives

[1] Publicly-traded equities in active markets
[2] Publicly-traded equities in inactive markets
[3] Privately-held equities

There were no transfers between levels of the fair value hierarchy for the six-month period ended June 30, 2021 or year ended December 31, 2020.

[ii] Day 1 Gains

Upon acquisition of a financial instrument, the Company measures its fair value and compares it to the acquisition price. The difference is recognised as a gain or loss only if fair value is based on a quoted price in an active market or based on a valuation technique that uses only data from observable markets. The Company has the following deferred day 1 gains:

As at	June 30, 2021		December 31, 2020

12. OTHER LONG-TERM RECEIVABLE

Notices of reassessment

Knight received notices of reassessment from the CRA and the QRA in July 2018 and January 2019 respectively. The notices relate to the disposition in 2014 of a PRV held by Knight's wholly-owned subsidiary, Knight Therapeutics (Barbados) Inc. A PRV is a transferrable asset that entitles the holder to a priority review for a drug of its choice.

The Company's PRV was granted on March 19, 2014 upon the FDA approval of Impavido® and was disposed of to a third party in November 2014 for gross proceeds of US$125,000. The notices of reassessment provide that Knight is liable to pay an aggregate of $23,340 and $18,242 to the CRA and QRA respectively in additional taxes and interest. Knight has made a deposit for the full amount to the CRA in July 2018 and to the QRA in February 2019.

Knight believes that the reassessments are unfounded and filed a notice of objection with CRA in September 2018 to start the appeals process. Based on the Company's view of the likely outcome of the appeals process, Knight expects to recover the total of $41,582 deposited and has not recorded any tax provision related to the disposal of the PRV in its financial statements. However, there can be no assurance regarding the outcome or when a resolution may be reached.

Although Knight believes its tax provisions are adequate, the final determination of tax audits and any related disputes could be materially different from historical income tax provisions and accruals.

13. SHAREHOLDERS' EQUITY

[i] Share capital

The authorized share capital of the Company is comprised of an unlimited number of common shares and an unlimited number of first preferred shares, which may be issued from time to time in one or more series, without par value. The issued and outstanding share capital of Knight is as follows:

	Notes	**Number of common shares**	**$**
Balance as at January 1, 2021		**130,039,341**	**694,351**
Issuance under share purchase plan	*[ii]*	30,201	158

Shares purchased under NCIB not yet cancelled		476,844	—[1]
Balance as at June 30, 2021		**125,664,970**	**668,425**

[1] Shares purchased under NCIB for $2,503 were not yet cancelled as of June 30, 2021 and recorded as treasury shares at cost of $2,548 against Share capital. Accrual of $2,503 was recorded in Accounts payable and accrued liabilities as of June 30, 2021. The treasury shares were cancelled subsequent to quarter end and the accrual settled in cash.

[ii] Stock-based compensation plans

The Company has three stock-based compensation plans: the Share Option Plan, the Share Purchase Plan, the Omnibus Equity Incentive Plan.

Share Option Plan

The Company had an equity-settled Share Option Plan ("the Option Plan") in place for employees, directors, officers and consultants of the Company. The Option Plan was approved by the Board of Directors and the shareholders on May 9, 2017 and re-approved by the shareholders on June 25, 2020. The aggregate maximum number of stock options outstanding under the Option Plan at any given time shall not exceed 10% of the outstanding shares of the Company as of the grant date. Effective May 13, 2021, the Company's Omnibus Equity Incentive Plan replaced the Share Option Plan for the new awards of Stock Options to directors, employees, officers and consultants of Knight.

Omnibus Equity Incentive Plan

On May 13, 2021 the Company adopted an Omnibus Plan upon approval by the shareholders. The Omnibus Plan permits the grant of stock options to employees, directors, officers and consultants of the Company, restricted share units ("RSUs") and performance share units ("PSUs") to employees and officers and deferred share units ("DSUs") to non-employee members of the Board of Directors of Knight. Under the Omnibus Plan, each holder of a unit of a RSU, PSU, and DSU has the right to receive upon vesting one common share of Knight or the equivalent amount in cash at the election of the Company.

The maximum number of common shares available for issuance pursuant to the Omnibus Plan and the Option Plan shall not exceed 10% of the then issued and outstanding common shares on a rolling basis. The total number of common shares available for issuance under the Omnibus Plan is 6,911,320 as at June 30, 2021.

Stock options

Stock options issued under the Share Option Plan and issued or issuable under the Omnibus Plan must be exercised within a period of time fixed by the Board of Directors that may not exceed ten-years from the grant date. The Board of Directors or its designated committee may determine when an option will become exercisable and may determine that the option will be exercisable immediately upon the date of grant, in instalments or pursuant to a vesting schedule. If no specific determination is made, the stock options vest in equal tranches of 25% per annum on each anniversary date. Stock options that have been exercised, expired, cancelled, forfeited or terminated become available for re-issuance under the Omnibus Plan. Generally, the stock options have a seven-year or ten-year term and vest over a one-year period for directors and a three or four-year period for employees.

The fair value of the options granted during the six-month period ended June 30, 2021 was estimated at $1.63 using Black-Scholes option pricing model using the following assumptions:

Six months ended June 30, 2021	
Share price on the date of grant	**5.65**

In May 2021, upon shareholders' approval the Company extended the expiry date of certain stock options held by its executive officers, directors and employees granted the year ended December 31, 2014 and expiring in 2021 by an additional 3 years. The incremental fair value of $1,210 was expensed in the quarter ended June 30, 2021 in general and administrative expense. The fair value of the modified stock options was determined using the Black-Scholes model with the following assumptions:

Share price on the date of grant extension	**5.65**
Weighted average exercise price	**5.63**
Weighted average risk-free interest rate	**0.53%**
Dividend yield	**Nil**
Weighted average volatility factor *[i]*	**25.66%**
Weighted average expected life	**3.07 years**

[i] Volatility was determined using the historical share price of the Company.

Deferred share units

The Company may grant DSUs to any non-employee director of Knight under the Omnibus Plan. The number of DSUs granted at any particular time pursuant to the Omnibus Plan is calculated by dividing the value of the grant over the market price of a share of Knight on the award date. The DSUs vest when the holder ceases to be a director of Knight for any reason. During the three months ended June 30, 2021, the Company granted 29,205 DSUs to non-employee board members. As at June 30, 2021, the number of outstanding DSUs was 29,205 (nil as at June 30, 2020).

Restricted share units and performance share units

The Company may grant RSUs to any participant under the Omnibus Plan. The RSUs expire and are settled by no later than December 31st of the third calendar year commencing after the date of award.

The Company may grant PSUs to any employee under the Omnibus Plan. The vesting of the PSUs is subject to the achieving future performance targets. No awards vest when the minimum performance thresholds are not achieved. The PSUs expire and are settled by no later than December 31st of the third calendar year commencing after the date of award.

The following table shows the RSUs and PSUs granted and outstanding at the beginning and end of the reporting period and the weighted average fair value at grant date per unit ("WAFV"):

The Company recorded an expense of $1,840 and $2,351 (2020: $227 and $697) for the three and six-month periods ended June 30, 2021 with corresponding credits to contributed surplus net of forfeitures related to the share-based compensation under the Share Option Plan and the Omnibus Plan.

Share Purchase Plan

The Company has a Share Purchase Plan ("Purchase Plan") which allows employees and directors of the Company to purchase common shares at listed market prices from treasury. The Purchase Plan was re-approved by the Board of Directors and the shareholders on May 7, 2019. The plan allows for employees to contribute up to a maximum of 10% of their salary and directors to contribute up to $10 per year. Under the Purchase Plan, the Company will contribute 25% of employees' or directors' contributions in the form of common shares if the employee remains employed by the Company or director remains on the Board and has held the original shares for two years from the original purchase

date. The Company's contribution in common shares is calculated using the lesser of the original common share value at the original purchase date and at the date of the Company's contribution. During the six-month period ended June 30, 2021, the Company issued 30,201 shares (2020: 20,560 shares) under the Purchase Plan for a total of $158 (2019: $133).

[iii] NCIB

On July 10, 2020, the Company announced that the Toronto Stock Exchange approved its notice of intention to launch a NCIB. Under the terms of the NCIB, Knight may purchase for cancellation up to 10,856,710 common shares of the Company which represented 10% of its public float as at July 6, 2020. The NCIB commenced on July 14, 2020 and ended July 13, 2021.

On July 12, 2021, the Company announced that the Toronto Stock Exchange approved its notice of intention to launch a NCIB ("2021 NCIB"). Under the terms of the 2021 NCIB, Knight may purchase for cancellation up to 10,267,956 common shares of the Company which represented 10% of its public float as at June 30, 2021. The 2021 NCIB commenced on July 14, 2021 and will end on the earlier of July 13, 2022 or when the Company completes its maximum purchases under the NCIB. Furthermore, Knight entered into an agreement with a broker to facilitate purchases of its common shares under the NCIB. Under Knight's automatic share purchase plan, the broker may purchase common shares which would ordinarily not be permitted due to regulatory restrictions or self-imposed blackout periods.

During the three and six-month periods ended June 30, 2021, the Company purchased 1,324,076 and 4,881,416 common shares for an aggregate cash consideration of $6,954 and $25,546, of which $2,503 remains to be settled as at June 30, 2021. Subsequent to quarter-end, the Company purchased an additional 2,675,917 common shares for an aggregate cash consideration of $13,865.

15. EARNINGS PER SHARE

Basic

Basic earnings per share is calculated by dividing net income by the weighted average number of common shares outstanding during the period.

Basic earnings per share	**$0.230**	$0.133	**$0.256**	$0.118

Diluted

Diluted earnings per share have been calculated after adjusting the weighted average number of shares used in the basic calculation to assume the conversion of all potentially dilutive shares. A potentially dilutive share for the Company consists of share options where the exercise price is below the average market price of the Company's shares during the period and the DSUs, PSUs and RSUs issued under Omnibus plan. Diluted earnings per share is determined using the treasury stock method to evaluate the dilutive effect of stock options and DSUs, PSUs and RSUs. PSUs are included in the dilutive calculation only when the performance target associated with the PSU is met.

16. SEGMENT REPORTING

Upon the acquisition of an additional 48.7% of GBT (resulting in 99.9% ownership of GBT) in August 2020, the Company had one reportable segment, namely the development, acquisition, in-licensing, out-licensing, marketing and distribution of innovative pharmaceutical products, consumer health products and medical devices in Canada and select international markets. This reflects the revised management structure and the way that the chief operating decision-maker evaluates the business. As a result of the change in ownership, the Company retrospectively revised the segmented information for the comparative period to conform to the new segmented structure.
